GAMLj - General Analyses for Linear Models 1.0.5

[View on GitHub](#)

A suite for estimation of linear models, such as the general linear model, linear mixed model, generalized linear models. For each family, models can be estimated with categorical and/or continuous variables, with options to facilitate estimation of interactions, simple slopes, simple effects, post-hoc tests, contrast analysis and visualization of the results.

INSTALLED

jAMM - Advanced Mediation Models 1.0.0

[View on GitHub](#)

A suite for estimation of mediational models, including multiple mediators, and conditional mediation.

INSTALLED

distrACTION - Quantiles and Probabilities of Continuous and Discrete Distributions 1.0.0

[View on GitHub](#)

A tool for calculating and plotting the cumulative distribution function (CDF) and the quantile
